PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of experience building scalable web applications using React.js, Next.js, TypeScript, and JavaScript. Proven expertise in frontend architecture, performance optimization, reusable component systems, AI-powered product development, and large-scale application modernization. Experienced in leading React migrations, building complex UI workflows, and collaborating across product, design, and engineering teams to deliver impactful user experiences at scale.

EDUCATION

- Pune University** Pune, India
MSc Honors - Computer Science Aug 2020 - July 2022
- Delhi University** Delhi, India
BSc Honors - Computer Science April 2017 - May 2020

SKILLS SUMMARY

- Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap
- State/Data:** Redux, Zustand, Context API, IndexedDB, REST API Integration
- Architecture:** Micro-frontend Architecture, Component Design Systems, Performance Optimization, Accessibility
- Backend:** Ruby on Rails, MySQL, MongoDB, Python
- Testing:** Jest, React Testing Library
- Tools:** Webpack, Babel, Git, Figma

EXPERIENCE

- MANGOAPPS** Pune, India
Software Developer July 2022 - Present
 - Company Pages Optimization:** Refactored company pages using React.js, and IndexedDB caching, reducing load time by 25% and bug reports by 15%.
 - Node Tree Architecture:** Architected and implemented a scalable node-tree system for dynamic page creation, driving technical design decisions for hierarchical content structures, reusable layouts, and flexible content management workflows.
 - AI-powered Content Creation:** Built prompt-driven workflows and service layers integrating AI APIs for automated content and image generation, accelerating page creation and improving user productivity.
 - File Management System Revamp:** Modernized the file management experience, improving navigation, uploads, organization, searchability, and usability for enterprise-scale content management.
 - Performance Improvement:** Improved application performance by 40% through lazy loading, code splitting, and memoization across 8+ modules.
 - React Migration:** Led technical planning and execution of a React v0.14 to React v17 migration across 70+ instances, establishing migration patterns and improving maintainability, stability, and developer productivity.
 - Dashboard and Newsfeed Revamp:** Owned modernization of 60+ dashboard and newsfeed widgets using React, Redux, and REST APIs while coordinating with product, design, QA, and backend teams to ensure seamless delivery.
 - Full-stack Delivery:** Delivered full-stack features across React, Ruby on Rails, and MySQL, including scheduling, library management, project banners, and accessibility enhancements.
- GFACTORS** Bangalore, India
Software Developer Intern September 2021 - March 2022
 - Full-stack Development:** Worked on full-stack development using JavaScript, Bootstrap, Python, Jupyter Libraries, and MongoDB.
 - Debugging and Optimization:** Collaborated with senior developers to troubleshoot stack-level issues and improve application performance.

PROJECTS

- Visual Workflow Builder:** Architected a drag-and-drop workflow automation platform using Next.js, TypeScript, React Flow, Zustand, and Tailwind CSS. Built a node-based visual editor supporting dynamic node creation, workflow connections, real-time property editing, workflow persistence, and reusable workflow nodes while implementing scalable state management and optimized rendering for complex workflow graphs. [GitHub: github.com/VidushiSingla99/visual-wf](https://github.com/VidushiSingla99/visual-wf)
- AI Data Visualization Platform:** Built a data visualization platform using React, Next.js, TypeScript, Node.js, and Prisma; deployed on Vercel with source code available on GitHub. [GitHub: github.com/VidushiSingla99/ai-dashboard](https://github.com/VidushiSingla99/ai-dashboard)

HONORS AND AWARDS

- Annual Debut Award - 2023
- Best Engineering Team - 2024
- Best Collaboration Award - 2026
